

MARTYN F

LIMES

VARIANT: ONE LAST CARD

This variant adds **one more round** to the game. So you play 17 rounds.

You do not place the 17th card in the normal way, but you **place it on top of your landscape**. It must cover exactly 4 squares and can overlap 1 or more cards. It can not protrude outside the existing landscape.

If there are workers on the squares where you place the card, these **workers return to your stock**.

After you have placed this 17th card, you can **place or move a worker**, just like you normally do.
