

MARTYN F

# LIMES

## The Woodcutter

The woodcutter receives:

- One point for each bordering territory.

Water, grain and woods: A territory consists of one or more horizontally and vertically adjacent squares of the same landscape.

Watch towers: Each watch tower forms a territory on its own.

*This woodcutter receives:*

- 1 Point for each adjacent watch tower = 4 Points.
- 1 Point for each adjacent water territory = 6 Points.
- 1 Point for each adjacent grain territory = 1 Point.

*Total: 11 Points*
